What are the different energy levels of the different macronutrients? How can you use this to calculate energy value?

**9**  
Sodium is a mineral. Why do we need it? Where is it sourced from?

**10**  
Heat can be transferred in 3 different ways. What are they and how do they work?

**11**  
Different ages groups have different nutritional needs. Give 2 examples of this.

**12**  
Fluoride is a trace element. Why do we need it? Where is it sourced from?

**13**  
What are the positives and negatives to food packaging?

**14**  
What is Diabetes? What health problems are linked with diabetes? How is diabetes caused?

**15**  
What is meant by saying that 'proteins denature'? When and how does this happen?

**16**  
What are some alternative proteins? Why would someone choose to eat these rather than animal sources

**17**  
Iron is a mineral. Why do we need it? Where is it sourced from?

**18**  
What is PAL? How can you use BMR and PAL to work out the daily energy requirements for a person?

**19**  
What are the different fishing methods that can be used? What does sustainable fishing mean?

**20**  
Give 2 dishes that are representative of each country within the UK.

**21**  
Why is Vitamin E needed by the body? Where can it be found?

**22**  
Give 3 examples of primary processing of food.

**23**  
Give 5 reasons as to why food is cooked.

**24**  
What does it mean if a person has 'food security'?

**25**  
What does BMI stand for and how is this measured?

**26**  
What are the main reasons for food waste? How can food wastage be reduced

**27**  
How does the process of (starch) gelatinisation work?

**28**  
What is meant by the terms 'food miles' and 'carbon footprint'?

**29**  
What is emulsification? Give an example food that is emulsified.

**30**  
Explain the processes of shallow frying and stir frying.

# June

Spend 10 minutes a day revising the topic / answering the question in the calendar.

1  
Give 3 ways in which food can be secondary processed.

2  
What alternative ingredients could be used for someone who has coeliac disease?

3  
Why is Vitamin K needed by the body? Where can it be found?

4  
What is 'fairtrade'? How can someone know if what they are buying is fairtrade?

5  
In what ways could a poor diet affect the skeleton and bone structure?

6  
Give 4 dishes / features of a traditional Japanese meal/cuisine.

7  
What does it mean if a person experiences 'food poverty'? What can be the cause of food poverty?

8  
Why is water so important for the body to function?

9  
  
Your exam is 16<sup>th</sup> June  
Use these days to Recap & practice questions.
